## School Fair Meeting Held

A meeting was held on Saturday, April 17th, at 2 p. m. to complete re organization of the Chinook & District School Fair for 1937.  
W. A. Todd acted as chairman

### NOMINATIONS

Pres. W. A. Todd  
Vice Pres. E. B. Allen  
Miss M. Otto Sec-Treas

Mr. Allen Mrs. Shier — that this meeting endorse the appointment of the following directors made by the School Districts:

Heathdale Mr. Cleven  
Peyton Mrs. Shier  
Collholme Mrs. Wilson  
Cando Mr. Falconer  
Clover Leaf Mr. Allen  
Chinook Cons — Mrs Cooley  
Mr. Morrell and Mr Connor

Mrs. Shier Mr. Allen — that the minutes of the last meeting be adopted as read

Mrs. Shier Mr. Morrell — that the secretary write the larger unit requesting \$5.00 per district, informing them that in the event of not receiving this amount we might be forced to discontinue the Fair.

Mrs. Wilson Mr. Allen — that the Financial Statement be accepted.

Mrs. Allen Mr. Morrell — that we hold a School Fair this year

Mrs. Shier Mr. Allen — that Mrs. Cooley, Mr. Morrell and Mr. Todd be a committee to solicit donations from the people in town and interview the Athletic Club, Orchestra, and etc.

Mrs. Allen, Mr. Morrell — that Mesdames Wilson, Shier and Miss Duff be a committee to raise funds in the country for the School Fair

Moved that the Secretary and President be authorized to deposit the School Fair funds in the Bank and issue cheques for same

Former Chinook Juvenile stopped at B. C. boundary— Given in custody of mother for 4 months. At end of 4 months it is reported he will have reached full age of 21 and therefore able to drive car alone.

## WEDDING

### GARDINER-ANDERSON

The marriage took place in Rowley on March 16th, of Miss Anna Gardiner and Mr. Wilfred Anderson, eldest son of Mr. and Mrs. Dan Anderson of the Mastina district, north of Chinook.

On Wednesday of last week, the bride was entertained at a miscellaneous shower by her many friends in the Rowley district.

That the executive be a committee to make any changes in the prize list and that for the present the prize list remain the same as last year

That all school work be in the hands of the Secretary not later than June 30th

That all organizations etc, donating to the School Fair be asked to place their donations in the general fund if possible

That all school children be allowed to partake in the sports on the day of the Fair and that a race be held for pre-school age children

That the Secretary's salary be \$15.00

That prizes be given for exhibits grown from School Fair seeds only

That the Secretary write to outside companies' organizations etc., for donations

That the meeting adjourn.

M. Otto  
Sec-Treas.

## WEDDING

DeYoung-Tobin

A very pretty wedding was solemnized on Thursday, April 4th, in Our Lady Of The Valley church, at Conoga Park, in San Fernando Valley, Ida Grace Tobin, of Youngstown, Alberta, became the bride of Joseph Wallace DeYoung, of Los Angeles, California. Rev. Father Daley officiated.

The bride was prettily attired in a white kaol cloth suit decorated with pink georgette blouse, white turban hat with small veil and white accessories. She wore a corsage of pink sweet peas and white carnations. Her cousin Marion Tobin was Maid of Honor. She wore a grey ensemble with blue accessories. The groom was attended by his brother, James DeYoung.

The church was beautifully decorated with roses and lilies of the valley. The bride entered the church on the arm of her uncle, Vincent Tobin, to the strains of Lohengrin's Wedding march

After the ceremony was performed, a reception was held at the home of the groom's parents. About 40 friends and relatives were present at a turkey dinner.

The table was tastefully decorated in pink and white, with a beautiful wedding cake in the centre.

After the reception the happy couple left for a two weeks honeymoon to be spent in motoring through Southern California and Mexico. They will later reside at 233 W-112 St, Los Angeles.

Mr. Moyer of Cereal was a Chinook visitor on Tuesday.

### Hidden Wealth On The Prairies

For some time past there has been a growing suspicion in the public mind that in all probability there are large yet undiscovered quantities of petroleum and natural gas in the bowels of the earth beneath the soil of all three prairie provinces, sufficient natural gas perhaps to provide for the heating and cooking requirements of all the large centres and many of the towns and villages of Alberta, Saskatchewan and Manitoba for a long time to come and possibly enough crude oil to meet the needs of the population for many decades.

There was a time, and not so very long ago either, when it would have been thought a wise precaution to have the head examined of anyone who had the hardihood to venture such a prediction, but in the last few years and as recently as the last few months evidences of such possibilities have been piling up to such an extent as to make these potentialities appear to be neither so far-fetched nor so remote.

Support for optimism in this respect is to be found in recent discoveries of crude oil at great depth in the Turner Valley field in Alberta. In the confirmation of the tenability of geological theories resulting from tests which are being made at progressive speed in all three provinces and in the additional knowledge which is being gained as a result of field work supported by improved scientific aid.

It is true that to date neither natural gas nor petroleum has been found in commercial quantities in Manitoba and that in Saskatchewan gas of adequate flow has been located definitely in only one field, that at Lloydminster on the Alberta border, and no petroleum in paying quantities.

In Alberta while natural gas has been in use for a number of years as a supply for the larger centres, the rock pressure has decreased alarmingly as a result of wastage and it is only in recent months that heavy crude petroleum containing all the desirable by-products has been located in paying quantities.

So that despite the pioneering work that has been done in the province bordering the Rockies, Alberta is equally interested as Saskatchewan and Manitoba in any reasonable assurances that new and greater quantities of either of these great natural resources may possibly be found, either in new fields or in existing fields at greater and hitherto almost untapped depths.

As stated at the outset such reasonable assurances are not lacking and they come from geologists of national and international repute. Wise men of that calibre with a reputation at stake are naturally cautious in their pronouncements, what they are saying to-day gives rise to optimism.

In the last few years a number of geologists have confirmed the findings of Dr. G. S. Hume, Federal geologist who has done pioneer work in mapping out geologic zones in the three prairie provinces and all of them speak with approval of his statements that across the Great Plains geological structures favor the possibility of existence of oil and gas in commercial quantities. Some go even further and state an unhesitating belief that both will eventually be found and that possibly they will in course of time prove to be the greatest reservoirs on the North American continent.

In a survey of activities to date and prospects for the future throughout the three provinces, in the Montana Oil and Mining Journal, Grenville Gates Howard, nationally known geologist refers to the prospects of the discovery of gas and oil in Saskatchewan and Manitoba, and with respect to testing to be done shortly in southwest Manitoba, quotes Dorsey Hager, internationally known geologist and petroleum engineer of Duluth in the following words:

"Testing there should encounter oil and gas under 2000 feet in the basal Cretaceous and in the Devonian. The finding of oil and gas in that area will open the western part of Manitoba and most of Saskatchewan for development" and adds: "The discovery of commercial oil in Western Manitoba will undoubtedly stimulate one of the most aggressive campaigns that has been known on the North American continent. Once oil has been found there, it seems to me, that British capital will initiate a tremendous campaign to develop resources within the Empire."

It requires no stretch of the imagination to read into these hints the thought that such developments would result in a much-needed impetus towards prosperity in a section of the Dominion which has suffered much in recent years because of its almost sole reliance on a single industry; but because of the natural difficulties which the search for these minerals entails in the Western Canadian provinces, there is also the need for caution on the part of those who might be encouraged to invest what little money they can afford, and perhaps more than they can afford in a hazardous enterprise. What is needed is heavy investment of outside capital from sources where money is available in large amounts.

#### Hailed As Rainmaker

Downpour Follows Visit Of Mussolini To North Africa

To many of the natives of Italian Libya, Premier Mussolini has become the great giver of rain. At the time of his recent visit to Italy's North African domains, the Arab and Berber population were praying for rain for their crops and pastures, which needed it badly. Shortly after an extraordinary rainfall answered their prayers, and to-day many of them were attributing it to the intervention of Il Duce.

#### Detect Weed Seeds

Instrument Perfected By University Of Toronto Professor

Dr. D. H. Himey, of the department of botany, University of Toronto, has perfected an instrument for weed seed detection. Enlarged stereoscopic views are made by photographing through the lens of a microscope. The instrument will detect weed seeds in lots of sowing seeds.

Vampire bats are able to walk, like any other mammal. 2199

#### Preparations Completed

Canada Ready For Experimental Air Mail Flights

Canada will be ready when the first of Britain's great flying boats cross the Atlantic this summer in experimental flights preparatory to establishment of regular air mail and passenger service across the ocean. Preparations in this country have been completed.

Work is proceeding in Newfoundland on two seaplane bases and an airport and landings can be made at two points, Gander Lake, in the northern interior, or Botwood, north of Harbor Grace on the east coast. The airport is being constructed at Hattie's Camp on Gander Lake, lending to belief the northern base will be the final choice.

Canadian terminals of the flights will be at St. Hubert airport, near Montreal, the flying boats landing on the St. Lawrence River, close to the airport.

Their arrival will bring to fruition a 10-year-old dream of an Empire trans-Atlantic service. Montreal's great airport was opened in 1928. A giant dirigible mooring mast stood at the northeast end. It was used once. To it in the summer of 1930 was moored the British airship R-100, forerunner of what was to have been a mail and passenger service by lighter-than-air craft.

Not long afterwards the R-101, sister ship to Canada's visitor, went down in France with heavy loss of life and the United Kingdom abandoned dirigible building.

#### The Mass Mind

Baldwin Fears Lost Mechanized World Will Break Down Character

Prime Minister Baldwin expressed dread lest a mechanized world would mean Britons would lose their independent, individualistic character. Guest of honor at a dinner given by the Federation of British Industries, the prime minister discussed industrial changes of the past 50 years.

The increasing speed of the modern age had brought problems, he said. Nervous breakdown, unknown 50 years ago, was a common ailment to-day. He stressed the importance of research by leaders of industry, labor and doctors into the reaction of a life of speed upon nerves.

Baldwin urged maintenance of a healthy export trade and asked industry to promote enterprise in the special areas of industrial distress in order to assist the government's efforts in those areas.

Referring to the modern trend, he said: "I see a danger ahead that our people may become mechanized—mechanized not only in body but mechanized in mind."

"I dread the mass mind. I dread the loss of our independent, individualistic character that has made this nation what it is."

#### Molasses In Bricks

Increases Their Strength About 60 Per Cent. When Mixed With Mortar

Dr. H. E. Barnard, of Dearborn, Mich., told a Georgia chemurgic conference that sugar or cane molasses increases the tensile strength of bricks about 60 per cent. when mixed with a lime-sand mortar.

He said "maximum strength is reached by adding about 15 pounds of sugar to 1,000 brick."

Dr. Barnard added: "The chemurgist sees in the starch of grains and in the sweet juices of canes a raw material of greater potential value than they ever had as foods."

He said these juices would be "the basis for an industry which in the near future must fill the need for power now met by the distillate from crude oils. These starches and juices, he said, "may well furnish the key by which we will unlock the door to a new world for the farmer, a world undisturbed by shrinking markets or by other production."

A native of tropical America from Mexico to Chile, the white potato was used as food by the Indians long before the arrival of the white man.

#### MOTHERS; DAUGHTERS

NO need for women or girls to suffer every month from periodic pains, headache or aches. In Girlhood Dr. Pierce's Favorite Prescription is a very beneficial tonic. This is what Mrs. Sarah Jordan of 32 Darling St., Bradford, Ont., said: "At one time I was so sick I could hardly hold my head up and I felt wretched. I was so frightenedly upset, hardly slept a wink at night and my effort would leave me weary to cry. Also, I had pains in the back of my head and in the stomach. Dr. Pierce's Favorite Prescription only a short while when it helped me wonderfully. The pains no longer troubled me and the headaches and pain disappeared." New size, 20c. 28c.

Everybody's London, says an old lady kept a parrot which was always swearing. Every Sunday she kept a cover over the cage, removing it on Monday morning, thus preventing the parrot from swearing on the Sabbath. One Monday she saw her minister coming towards the house; she again replaced the cover over the cage. As the reverend gentleman was about to step into the parlor, the parrot remarked: "This has been a damned short week!"

A golf ball killed 74,000 fish when a player sliced his ball into the fish hatchery of Glacier National Park. The ball clogged the intake line and shut off the water.

It costs almost \$12,000 to cover an acre of ground with glass for growing hothouse produce.

#### Will Be Great Event

B.C. Indians Looking Forward To Lord Tweedsmuir's Visit

The Governor-General's trip through the Tweedsmuir National Park this summer will be another "year-date" for the resident Indians, says I. Goldman of British Columbia University.

Mr. Goldman spent some time last summer in this northern district of British Columbia, studying the Indians with a view to recording their old culture. He says few white men have ever journeyed through this country and the visit of the Governor-General, "the big chief," will be of far greater importance than the last eclipse of the sun or the government survey of 1912 which are now the year-marks for the Indians. Hereafter children will date their births from this year, the time of the governor-general's visit.

Mr. Goldman believes Lord Tweedsmuir has chosen the best time of the year for his trip, for by the time he reaches Burns Lake, the starting point of the trek through the park, it will be late August, the mosquitoes will be gone and the land will be dry and the weather pleasant.

Mr. Goldman likens the country to a "scene from a Wagnerian opera"—deep forests, green foliage, a land of light and shadow against a background of high mountains. The trip is beautiful, he says, by motor boat from Ootsa Lake through the ring of connecting waterways to Tetachuck Lake, then by the historic old Mackenzie trail to Gutsche Lake, the Indian reserve, and from there by the Mackenzie Highway past the highest waterfall in the Western Hemisphere and so to Bella Coola.

The Indians, carrier tribesmen, he describes as friendly, generous and likeable, holding still to old customs. They hunt and fish for food, and trap for skins to exchange for the white man's goods. By August, nearly all the Indians will be on the coast for the salmon fishing.

#### Tenth Cruiser Squadron

Merchants That Maintained Blockade In The North Sea

The Admiralty are going to revive the Tenth Cruiser Squadron first by the Coronation naval review as they did for the Jubilee, and thus perpetuate the memory of that storm battered group of merchantmen that maintained the blockade between the North of Scotland and the Arctic Circle throughout four years of war. Most of the ships had long since passed out of service and the new "Tenth" is to be composed of navy ships which are destined in the future to be the escort vessels of merchantmen in convoy.

The original Tenth Cruiser Squadron was commanded first by Admiral Sir Douglas Haig and then by Admiral Sir Reginald Tupper. At the Jubilee a composite Tenth was commanded by Rear Admiral Dickens. It is now announced that Rear Admiral A. N. Dowding will hoist his flag in the Colombo to command the squadron for the period of the review.—Manchester Guardian.

#### SELECTED RECIPES

##### CHERRY ROLL

Temperature: 425 degrees F. Time: 25 minutes.

1 cup "Crown Brand" Corn Syrup  
1 pint jar cherries (canned)  
1 cup sugar  
1 teaspoon cinnamon  
1 cup boiling water  
1 tablespoon butter  
Tea biscuit batter

Drain cherries and pour juice in a saucepan. Add the water, sugar and "Crown Brand" Corn Syrup. Boil 5 minutes. While the syrup is boiling mix an ordinary tea biscuit batter and roll it out in oblong roll. Spread the cherries over the dough; sprinkle with cinnamon, dot with butter and roll up like jelly roll. Place the roll in an oblong pan; pour the hot syrup over it and bake in a hot oven.

##### An Observant Parrot

Everybody's London, says an old lady kept a parrot which was always swearing. Every Sunday she kept a cover over the cage, removing it on Monday morning, thus preventing the parrot from swearing on the Sabbath.

One Monday she saw her minister coming towards the house; she again replaced the cover over the cage. As the reverend gentleman was about to step into the parlor, the parrot remarked: "This has been a damned short week!"

A golf ball killed 74,000 fish when a player sliced his ball into the fish hatchery of Glacier National Park. The ball clogged the intake line and shut off the water.

It costs almost \$12,000 to cover an acre of ground with glass for growing hothouse produce.

"Cleaning outhouses is easy with GILLETT'S LYE"  
"Yes—I use it regularly... It drives away odors fast"

### Keeps outside closets clean and sanitary—

● Keep your outhouse sanitary... odorless this easy way—once a week sprinkle half a tin of Gillett's Pure Flake Lye over contents of closet. It cleans thoroughly... quickly destroys contents.

There are countless uses for this powerful cleanser. It frees clogged drains, cuts right through grease, wipes off stubborn dirt, saves you hours of drudgery. Keep a tin always on hand.

Never dissolve lye in hot water. The action of the lye itself heats the water.

FREE BOOKLET—The Gillett's Lye Booklet tells how to use this powerful cleanser for dozens of tasks. Send for a free copy to Standard Brands Ltd., Fraser Ave. and Liberty St., Toronto, Ont.

#### People Were Generous

Over \$450,000 Donated Last Year To Three Red Cross Funds

The Canadian Red Cross received last year more than \$450,000 in donations to the western drought fund, the Moose River rescue fund and the American food relief fund, National Commissioner Dr. J. L. Biggar reported to the central council committee in Toronto.

Dr. D. E. Robertson's story of the Moose River mine imprisonment and rescue provided \$112,500 which was used to pay the cost of Alfred Scadding's hospital treatment and to purchase an annuity of \$500 a year for a minimum of 20 years and payable to Mr. and Mrs. Scadding in the future. Dr. Biggar said.

#### Money Savers

A new type of furnace which heats six-room houses at an expense of 25 cents a day is reported to have been evolved by a Kitchener, Ont. man. Like that new carburetor which may or may not move a car for 200 miles on a gallon of gasoline, this invention deserves every encouragement.

Nickel steel was first used in a locomotive boiler shell in 1904, and the engine is still giving regular service.

Hen eggs sold for \$1.50 each in California during the gold rush.

#### Rising Prices

Will Jeopardize Construction Industry If Trend Continues

The construction industry will be in danger of jeopardizing its own rising prosperity if present trends to price increases are continued further now, F. W. Nicolls, director of the Dominion Housing Act, warned.

They might, in effect, be "killing the goose that laid the golden egg," at least as far as residence building was concerned.

Within recent weeks, some branches of the industry have increased cost of supplies by 20 to 30 per cent, Mr. Nicolls said. While some increase was probably inevitable in a generally rising market, such increases as those named might be questioned as to complete justification, and might ultimately only work to the disadvantage of the industry itself, by discouraging prospective builders.

"Many builders are anticipating a higher cost than has actually come into effect," he said.

The instructor, having delivered a lecture on parachute work, concluded: "And if it doesn't open—well, that is what is known as jumping to a conclusion."

Ticks can live three years without food; eight months without water.

### A REVOLUTION IN THE KITCHEN

Presto-Pack is a new and revolutionary way of handling Household Waxed Tissue. 45 sheets packed in an envelope which you hang on the wall. Then as you require it, just draw out a sheet at a time. You can't draw more. That's the beauty of it.

Try Presto-Pack today. You'll find it the handiest thing in the kitchen.

At grocers, druggists, stationers and departmental stores.

## Railroader-Actor

Roy Emerson (above), English actor who played Moody, the railway contractor, in the Gaiety Theatre, British epic of Canadian Pacific Railway construction through the Rockies, "Silent Barriers," found himself right at home in the part when he went to the C. P. R. mountain division on location. The division was by no means new to Emerson who with his brother Percy served the railway there in 1912. Roy, the actor, as a fireman on "pusher" engines, and Percy as a round-house hostler at Revelstoke where much of the film's local color was filmed. Roy Emerson was a popular figure during the filming of the Canadian railway epic among the railroaders, many of whom were former associates.

## New Breed of Sheep for Canadian Farmers

Shown above on their arrival in Canada in the Canadian Pacific Steamships freighter Nevebras are several sheep that will mean a great deal to Canadian farmers in the future. They are a gift to the Province of Ontario from the Kerry Hill Flock Book Society in North Wales and are an outstanding breed of general utility sheep, which, due to their adaptability to any environment,

are expected to gain rapid favor in this country.

The gift of the pen of ten ewes and one ram was arranged through the good offices of W. Rupert Davies, president and editor of the Kingston, Ont., Which-Standard. These prize winners, products of generations of breeding with the most careful methods of selection being exercised, are destined for the Ontario Agricultural Society at Guelph, from where the strain is expected

to spread to other parts of the country.

An idea of the economic and eugenic value of the gift pen may be derived from the fact that the eleven animals took first prize at the annual Kerry Hill Sheep Fair where some 10,000 to 15,000 sheep were shown. Besides being able to withstand bleak weather, these sheep are handsome and symmetrical, and will, it is felt, prove of great value to Canadian farmers.

Dinner Party  
for Newly Weds

Thirty-four persons attended a Sunday dinner given by Mrs. Erickson in honor of her daughter Agnes, who recently became the bride of Mr. Elmer Van Dam.

Among those present were: Mr. and Mrs. W. S. Falconer, Mr. and Mrs. J. Turnbull, Mr. and Mrs. O. D. Harrington, Mr. and Mrs. O. Savage, Mr. and Mrs. L. Nailer, Mr. and Mrs. Paetz.

## Horses Sell Well

DRUMHELLER (Special)—Despite the fact he has been replaced by motor power, Dobbin can still hold his head high and demand a big price for himself in this district.

At the fourth annual horse sale here, Friday, 30 horses were sold at an average price of \$70.00 each. \$95.00 was the highest price paid for any one horse.

Bidding was brisk, with buyers from Eastern Canada, but the majority of sales were made to purchasers in the Drumheller district.

Boy Scouts of Canada Plan  
Celebration for Coronation  
of King George VI

Montreal, April 14.—Brightly burning beacons the length and breadth of Canada will, in age old style, signal the crowning of King on May 12th.

This unique feature in connection with the Coronation of His Majesty King George VI will be handled by the Boy Scouts of Canada, according to announcement today by Sir Edward Beatty G. B. E., K. C., L. L. D., President of the Canadian General Council of the Boy Scouts Association.

Calling to Scout Leaders to take the initiative in organizing celebrations on the occasion of the Coronation of His Majesty, who is Scout King of 86,000 Canadian Boy Scouts, Sir Edward recalled the most successful coast-to-coast beacon chain in 1935 marking the Silver Jubilee of the late King George V. It was the first time that an organized beacon celebration on such a scale was ever attempted in Canada and was a splendid success, due to the interest taken in the event by Boy Scouts and the great co-operation given them by the general public.

As public celebrations will likely be left largely to municipalities, Boy Scouts will again have opportunity to show on a large scale that their organization is one of Canada's important public service bodies, whose training produces young and older citizens of public spirit and enterprise.

Details of the Boy Scout participation in the Canadian Coronation celebrations have not yet been completed. It is understood, however, that the celebration will follow along lines similar to those which proved so successful on the occasion of the Silver Jubilee of his late Majesty, King George V. It is proposed that where Civic

## The Ladies Card Club Met

The Ladies' Card Club met at the home of Mrs. Todd Tuesday evening. The honors were shared by Mrs. Lee and Mrs. Turple. Next meeting will be held at Mrs. Walter Gallagher's with Miss M. Milligan as hostess.

Monthly Meeting of  
Chinook W. I. Held

The Chinook W. I. held their regular monthly meeting on Wednesday, April 7th with Mrs. Mortimer as hostess. The meeting opened with the singing of "Smiles" and repeating the Creed.

Mrs. Mortimer read an interesting paper on "Home Economics" and "Rural Life". The contest was won by Mrs. Turple.

The meeting adjourned, after which a very delightful lunch was served by the hostess.

Committees have already been appointed for local celebration. Scout Leaders should approach them and offer their close cooperation. In localities where no celebrations have been planned, Scouts will in all probability take the initiative, and seek the aid of Civic authorities or heads of other organizations in planning appropriate celebrations.

In arranging the coast to coast beacon fires, Scout Leaders will again select coastal headlands, mountains, and hilltops for sites, and the message of loyalty will be carried from the East to the West, and from the International boundary to the Arctic Circle.
